please do not interfere with this service that i pay for! if i didn't want it i wouldn't have bought the radio!! I am a truck driver and this helps me in my business!! I need to know what is happening before i get to the town or state and to plan my route according to weather and the traffic!!! It saves me time and money! It helps the law enforcement with us as well!!! I love being able to hear these stations/programs at anytime of day or night and how clear i can hear them from anywhere!! I do not know where the stations are in any town that has them for weather and traffic unless posted on a sign and by then it would be too late to go a different route to avoid problems and or by adding to the problem!!! So if you want to help more people out than just a few then please stop the nab's petition 04-160!!!! Plus all of the other stations programs gives us veriaty/lots of choises to choose from that help us to go down the road in a safer/happier way!!! It helps us to not have road rage!!!! Please allow us to keep our freedom of choise of useful tools for us Drivers that travel far!!!! Thanks and may God Bless you!!!
